April 22. Earth Day

Kada pokušamo da bolje razumijemo naš svijet i način na koji svojim životnim navikama utičemo na prirodne resurse, ohrabrujemo odgovoran odnos prema životnoj sredini.

Evidentan je trend rasta nivoa svijesti i razumijevanja posljedica karbonskog otiska na životnu sredinu, kod turističke privrede i među odgovornim turistima. Crna Gora je posvećena razvoju održivog turizma, a čuvajući raznolikost svoje geografije - planine, morska obala, doline, rijeke i jezera, turistima nudi iskustvo prirodne divlje ljepote.

Vlada Crne Gore i UNDP realizuju inovativni projekat „Razvoj niskokarbonskog turizma u Crnoj Gori“, koji će podržati transformaciju zemlje ka karbonski neutralnim putovanjima i turizmu, kroz podsticanje održivosti i inovacija u poslovanju. Projekat koji finansira Globalni fond za životnu sredinu (GEF), dopriniće smanjenju emisija štetnih gasova u sektoru turizma i na taj način, značajno ublažiti negativan uticaj turizma na životnu sredinu. Rješavanjem problema vezanih za prekomjerno zagađenje i klimatske promjene, pozivamo na djelovanje i angažman na lokalnom i globalnom nivou, za dobrobit i nas samih i budućih generacija. Ova jubilarna markica je naš doprinos za zdraviju planetu. #lovemontenegro

If we try to better understand our world, and the way our life impacts our natural resources we enable ourselves to take responsible environmental action. There is a growing awareness of the environmental problems within the tourism industry and amongst tourists as responsible consumers about the carbon footprints of tourism.

With its diverse geography - mountains, coastlines, lowlands, rivers and lakes Montenegro is dedicated to sustainable tourism development thus offering tourists natural wild beauty experiences.

The Government of Montenegro and UNDP are implementing the innovative project "Towards Carbon Neutral Tourism in Montenegro", which will help the country's transition towards carbon neutral travel & tourism, through fostering sustainability and encouraging innovation in business. The project, financed by the Global Environment Facility (GEF), will facilitate GHG emissions reductions from the Montenegrin tourism sector and thus lower its environmental impact.

By addressing the issues concerning excessive pollution and climate change we initiate a genuine action and engagement at both local and global level, for the benefit of present and future generations. This stamp is our contribution to a healthier Planet. #lovemontenegro
